

Ready to move forward? Simply contact your salesperson, who will send your diagram to Prime. Prime will then call you to confirm specifications, gutter colors, and collect a 25% deposit. You can pay this deposit by cash, check, or card (note: a 3% processing fee applies for card payments).

Once your deposit is received, your job will be scheduled. We'll notify you 3-5 days before your installation date. Please note that dates may shift due to weather or staffing issues. If there are any changes, we'll inform you.

Good news! You don't need to be home during installation. If you're away, we can still complete the work.

To prepare for installation:

- Clear any vehicles on the street in front of the house or make sure the driveway is cleared if the truck will need to be pulled into a long driveway to be close to the house and an electrical outlet.
- Please check the perimeter of the structure and nearby vegetation to make sure wasps and bees nests are fully removed. Please keep in mind if you have existing gutters, nests can be built in the old system.
- Ensure there's a working electrical outlet at the front of your home.
- Unlock any gates needed for access.
- Secure pets and pick up pet droppings.
- Trim tree branches and plants that may block access.
- Move any potted plants or deck chairs, etc. around the perimeter of the home where crews will be using ladders.
- Remove any items attached to the fascia like lights, satellites, or rain sensors.
- Let us know if your yard gets muddy after storms so we can plan accordingly.
- The installation arrival window is between 8am and 5pm.
- Changes made within 3 days of installation may cause delays or require a \$150 trip charge for processing. If gutter or downspout colors are changed within 3 days of installation, your deposit may be forfeited to cover the cost of new materials.
- If the crew cannot complete the installation due to customer-related delays, a \$150 trip charge will apply to reschedule. Rates may vary for locations outside the San Antonio metro area.

We are very excited to work with you and thank you for trusting Prime Seamless Gutters & Roofing to take great care of your project!
